More than 650,000 Iraqis have died as a direct result of the US invasion and occupation. At home, hundreds died unnecessarily in the aftermath of Hurricane Katrina. All the while, multibillion-dollar transnational corporations are reaping massive profits from the occupation. Bechtel, notorious for the "Big Dig", got \$680 million Iraq war contracts. Raytheon, the 5th largest war contractor, has record quarterly profits of \$5.152 billion! Halliburton, the infamous Dick Cheney corporation, has an open contract in Iraq: no limit to the time required, no limit on money spent!

How many more must die for these corporations? Our march targets these corporations and while our rally invites you to participate in planning and organizing the next big mobilizations to challenge the wars!
